| galois |

Exercise 1:

ffs_imp.c:

```
#include <stdio.h>
#include <stdlib.h>

typedef unsigned int uint32_t;

uint32_t ffs_imp(uint32_t word) {
   char n = 1;
   if (!(word & 0xffff)) { n += 16; word >>= 16; }
   if (!(word & 0x00ff)) { n += 8;  word >>= 8; }
   if (!(word & 0x000f)) { n += 4;  word >>= 4; }
   if (!(word & 0x0003)) { n += 2;  word >>= 2; }
   return (word) ? (n+((word+1) & 0x01)) : 0;
}

int main (int argc, char **argv) {
   if (argc != 2) {
      printf("Usage: %s <number>\n", argv[0]);
      exit(0);
   }
   uint32_t n = atol(argv[1]);
   printf("ffs_imp: first 1 at %d\n", ffs_imp(n));
}
```

Exercise 2:

ffs_ref.bc:

```
clang-12 -g -O0 -c -emit-llvm ffs_ref.c -o ffs_ref.bc
```

ffs_imp.bc:

```
clang-12 -g -O0 -c -emit-llvm ffs_imp.c -o ffs_imp.bc
```

ffs_imp.saw:

```
m1 <- llvm_load_module "ffs_ref.bc";
ffs_ref <- llvm_extract m1 "ffs_ref";

m2 <- llvm_load_module "ffs_imp.bc";
ffs_imp <- llvm_extract m2 "ffs_imp";

let thm1 = {{ \x -> ffs_ref x == ffs_imp x }};
result <- prove z3 thm1;
print result;
```

running ffs_imp.saw:

```
saw ffs_imp.saw
[19:05:02.280] Loading file "<path-to-ffs_imp.saw>/ffs_imp.saw"
[19:05:02.439] Valid
```

Exercise 3:

ffs_mus.c:

```
uint32_t ffs_mus (uint32_t word) {
  static const char debruijn32[32] = {
    0,  1, 23,  2, 29, 24, 19,  3, 30, 27, 25, 11, 20, 8,  4, 13,
   31, 22, 28, 18, 26, 10,  7, 12, 21, 17,  9,  6, 16, 5, 15, 14
  };
  return word ? debruijn32[(word & -word)*0x076be629 >> 27]+1 : 0;
}

int main (int argc, char **argv) {
   if (argc != 2) {
      printf("Usage: %s <number>\n", argv[0]);
      exit(0);
   }
   uint32_t n = atol(argv[1]);
   printf("ffs_mus: first 1 at %d\n", ffs_mus(n));
}
```

ffs_mus.bc:

```
clang-12 -g -O0 -c -emit-llvm ffs_mus.c -o ffs_mus.bc
```

ffs_imp.saw:

```
m1 <- llvm_load_module "ffs_ref.bc";
ffs_ref <- llvm_extract m1 "ffs_ref";

m2 <- llvm_load_module "ffs_mus.bc";
ffs_mus <- llvm_extract m2 "ffs_mus";

let thm2 = {{ \x -> ffs_ref x == ffs_mus x }};
result <- prove z3 thm2;
print result;
```

running ffs_imp.saw:

```
saw ffs_mus.saw
[17:40:08.109] Loading file
"<path-to-ffs_mus.saw>/ffs_mus.saw"
[17:40:08.280] Valid
```

Exercise 4:

ffs_bug.c:

```
uint32_t ffs_bug(uint32_t word) {
   int i = 0;
   int cnt = 0;
   if (!word) return 0;

   /* injected bug: */
   if (word == 1052688) return 4; /* instead of 5 (in hex: 0x101010) */

   for (cnt = 0; cnt < 32; cnt++)
     if (((1 << i++) & word) != 0) return i;
   return 0;
}
```
